1. Road to Water Well
2. Transformer Building
Doors and Frames

25X1A9a

Dear Mr. [REDACTED]:

Reference is made to your letter of 14 September 1953 concerning same subjects.

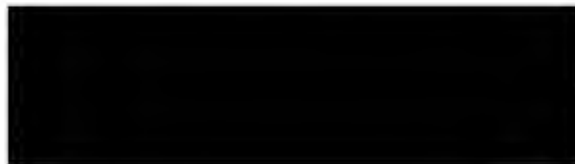

With respect to Item 1, your suggestion that a minimum type road be provided is approved. In view of your first-hand knowledge of the conditions at the site, it is requested that you issue to the Contractor a simple specification for the work to be included as Item 2 of the Modification in connection with the relocation of the well. The original and two copies of the modification form are enclosed herewith for that purpose, together with blank second sheets in case you may require them.

These can then be forwarded to [REDACTED]

25X1A

Your assumption with respect to the metal doors for the Transformer Building is correct.

Very truly yours,

25X1A9a
